

PDF Files

Scan – Create – Reduce File Size

It is recommended that you purchase an Adobe Acrobat product that allows you to read, create and manipulate PDF documents. Go to <http://www.adobe.com/products/acrobat/matrix.html> to compare Adobe products and features –Adobe Acrobat Standard is sufficient.

Scanning Documents

You should only have to scan documents that are not electronic, and when you are unable to create a PDF using PDFMaker or the Print Command from the application you are using.

Signature Pages

If you have a document such as a CV that requires a signature on a page only print the page that requires the signature –printing the entire document and scanning it is not necessary or desired. Once you sign and scan the signature page you can combine it with the original document using the Create PDF From Multiple Files feature.

Scanner Settings

Before scanning documents remember to make certain that the following settings are activated on your scanner (settings may vary):

- Document Mode
- Scan to smallest size
- Fast (lowest quality)
- Grayscale or black and white
- Resolution: 300dpi or less

Creating PDF Documents

Option 1 – Use Adobe PDF Printer Command:

In many authoring applications, you can use the Print command with the Adobe PDF printer to convert your file to PDF.

Create a PDF using the Print command (Windows)

1. Open the file in its authoring application, and choose File > Print.
2. Choose Adobe PDF from the printer menu.

3. Click the Properties (or Preferences) button to customize the Adobe PDF printer setting. (In some applications, you may need to click Setup in the Print dialog box to open the list of printers, and then click Properties or Preferences.) Choose Smallest File Size as your default setting.

4. In the Print dialog box, click OK and Save your file.

Create a PDF using the Print command (Mac OS)

1. Open the file in its authoring application, and choose File > Print.
2. Click on the PDF button in the Print window.
3. Click Save as PDF.

Reducing File Size Options

WebDCU will accept files up to 2.0MB.

Here is a rough estimate for PDF file sizes:

If the contents are pure text, like a CV, the file size is usually 10kb per page; therefore, a 1MB file will have about 100 pages. If the file includes some pictures, the file size may increase. If the file is a picture, like a scanned license or certification, you may have different file sizes based on the picture quality. In most cases, saving the file at about 250kb per page should be enough to generate a clear picture.

Option 1 – Use Adobe PDF Print Command:

1. Open the PDF file, and choose File > Print.
2. Choose Adobe PDF from the printer menu next to Name.
3. Click the Properties (or Preferences) button to customize the Adobe PDF printer setting. (In some applications, you may need to click Setup in the Print dialog box to open the list of printers, and then click Properties or Preferences.) Choose Smallest File Size as your default setting.
4. In the Print dialog box, click OK.
5. Save the new (smaller) PDF file.

Option 2 – Use Adobe PDF “Reduce File Size”:

1. Open the file in Adobe Acrobat and choose File > Reduce File Size...
2. For our purposes, please make these files "compatible with" version Acrobat 5.0 or later.
3. Save the new (smaller) PDF file.
